PROBLEMATIC REMARKS

- 1. The actual spare parts list QC checked as below .
- 2. All product haven't been packed, inspector performed witness the debug tests on site, pls the videos.
- 3. There was no nameplate on Genset, the factory will affix after the debug test.
- 4. The switch uses 630A instead of 500a required by Client; For Stamford item HC1444ES1, instead of HC1444ES required by Client. To be confirmed by Client.
- 5. Actual Starting current(Max)&Working current& Output voltage check result during inspection, please check Report on Page 10-13, the factory said would send English version later.

Please see below attached photos to demonstrate the above Problematic Remarks:
